The Foundation Center’s mission is to strengthen the nonprofit sector by advancing knowledge about U.S. philanthropy. We are pleased to present this brief exploration into health grantmaking and hope that it will help you gain insights into the state of health grantmaking in Georgia. This report briefly explores trends and the top funders in Georgia’s health grantmaking.

This report includes statistical charts and tables based on the Center’s annual grants sample, a mini-directory, and a spotlight on an innovative approach to health grantmaking, the Philanthropic Collaborative for a Healthy Georgia.

GEORGIA GRANTS SAMPLE

Each year the Foundation Center indexes all of the grants of $10,000 and more awarded by more than 1,000 of the nation’s largest private and community foundations. Our most recent (2004) sample includes over 126,000 grants awarded by 1,172 U.S. foundations totaling $15.5 billion. Of the 1,172 foundations in the sample, this report analyzes health grants made to Georgia recipients by 95 foundations, 18 that are based in Georgia and 77 that are based outside Georgia, totaling $91 million.

PRIMARY PURPOSE

Funding for General and Rehabilitative Health—which includes support for hospitals and in-patient care, outpatient clinics and care, public health, reproductive health, and health care financing and policy, among other purposes—accounted for nearly 60% of all Georgia giving for health in 2004. Within that category, nearly half targeted public health. Although non-Georgia foundations also favored General and Rehabilitative Health, they were far more likely to support care and treatment of specific diseases than were Georgia-based foundations.

TARGET POPULATION

Among specified population groups, children and youth benefited from more than one-fourth of Georgia-focused health grant dollars. Economically disadvantaged and disabled populations followed with 16.1% and 11.7% of total grant dollars, respectively.

MINI-DIRECTORY OF GEORGIA FOUNDATIONS
THAT FUND HEALTH PROGRAMS

The following private and community foundations were identified in the Foundation Center’s 2004 grants sample as awarding the greatest number of health grant dollars to Georgia recipients. For most of the funders in this directory, health is just one among many areas of interest for their grantmaking. The descriptions provided here attempt to capture just their health interests, but should not be taken as an indication that they devote their grantmaking exclusively to health.

The Aflac Foundation, Inc.^
Atlanta
Description: The foundation supports community health systems and organizations involved with education, pediatric cancer, disease, cancer research, public safety, and human services.
Selected Grants:
$602,202 to St. Francis Hospital Foundation,
$40,000 to Shepard Center, for capital and
$15,000 to the Arthritis Foundation, for programs.

J. Bulow Campbell Foundation*^]
Atlanta
Web: jbcf.org
Description: Supports a variety of charitable organizations serving the general welfare of the community, education, youth, Christian concerns and, to a limited extent, arts and cultural organizations.
Selected Grants:
$800,000 to Inner Harbor, for capital campaign
$100,000 to Kids’ Health, for capital campaign
$250,000 to CHRIS Kids, for capital campaign for new group homes

Community Foundation for Greater Atlanta, Inc.*^]
Atlanta
Web: atlcf.org
Description: Health priorities include services for the homeless, fitness and nutrition of school-aged children, and HIV/AIDS.
Selected Grants:
$52,000 to Center for Black Women’s Wellness, for continuing support
$20,000 to Community Advanced Practice Nurses
$22,500 to Grady Health System, for development of teen reproductive health services

J. B. Fuqua Foundation, Inc.*
Atlanta
Description: Grants primarily for education; support also for health, hospitals, and social services.
Selected Grants:
$40,000 to Arthritis Foundation
$5,000 to the Center for the Visually Impaired
$500,000 to Piedmont Hospital, for the Fuqua Heart Center

Georgia Power Foundation, Inc.*^]
Atlanta
Web: southerncompany.com/gapower/charitable
Description: Supports education, the environment, cancer prevention, and diversity.
Selected Grants:
$25,000 to Children’s Healthcare of Atlanta
$10,000 to Front Porch of Atlanta, for operating support
$10,000 to St. Joseph’s Mercy Foundation, for operating support

The Arthur M. Blank Family Foundation
Atlanta
Description: Supports education and human services.
Selected Grants:
$125,000 to Children’s Healthcare of Atlanta
$5,000 to Camp Twin Lakes, a camping facility for children with chronic illnesses
$125,000 to the American Association for Cancer Research
$250,000 to CHRIS Kids, for capital campaign
$10,000 to Front Porch of Atlanta, for operating support
$5,000 to Sophia Academy, for operating support

The Wilbur and Hilda Glenn Family Foundation
Atlanta
Description: Supports education and human services.
Selected Grants:
$25,752,804

FOCUS ON THE PHILANTHROPIC COLLABORATIVE 
FOR A HEALTHY GEORGIA

Georgia Health Policy Center
Georgia State University, Atlanta
philanthropiccollaborative.org

“Although many Georgia foundations do not have health as a stated funding priority, most of them have great concern for the overall well-being of the state’s families and communities.”

—Bobbi Cleveland, Tull Charitable Foundation

The Philanthropic Collaborative for a Healthy Georgia evolved out of a series of meetings hosted by the Georgia Health Foundation during 1999-2000. The Collaborative is an informal, loosely structured group that brings Georgia foundations together to better understand and respond to health-related challenges facing the State. Its primary purpose is to enable foundations to be more informed and effective in their own health-related grantmaking activities, through conferences, newsletters and policy papers.

The Collaborative occasionally pursues opportunities that allow foundations to work together proactively in order to jointly fund health-related projects that are critical to improving the quality of life in Georgia’s communities. These initiatives sometimes pair foundation funds with public sector monies. Joint projects have included:

◆ The School Health Initiative, which provided 13 communities with $901,000 in private and public sector funds to provide health education, health services, and vision, hearing, dental and nutrition screenings to low-income and medically underserved children through school health programs over a three-year period;

◆ The Rural Health Initiative, which provided nine organizations serving 37 rural counties, with $1,757,805 in public and private funds to improve health status and access to care for rural Georgians; and

◆ The Cancer Initiative, which produced the Framework for Community Based Cancer Prevention and Control, a valuable tool for local communities in their efforts to reduce the incidence of cancer.

The Georgia Youth Fitness Assessment, the Collaborative’s current project, will collect baseline data on physical fitness and physical activity from about 2,000 fifth-graders and 2,000 seventh-graders in 100 randomly selected Georgia schools. Almost $700,000 has been raised from private and public entities to support this initiative.

Participation in the Collaborative is open to all Georgia grantmakers and requires no membership fees or dues. The work of the Collaborative is guided by a Steering Committee. The Georgia Health Policy Center at Georgia State University provides staff support for researching issues and best practices; developing policy briefs; organizing workshops; and coordinating jointly funded projects. The Health Policy Center’s work for the Collaborative is funded by foundation grants.

“The Collaborative operates on the belief that if Georgia is to have healthy families, communities, and schools, and a healthy economy, it must first have healthy citizens.”
